

REESKOVA

Corporate Presentation for Companies

Real-estate firms · Dealerships · Developers · Service partners · Multi-branch operations

REESKOVA is the premium marketplace for properties, vehicles and services powered by RSC Group. This document presents, in operational detail, the digital infrastructure available to companies that want to publish verified inventory, capture qualified demand and manage the commercial relationship with buyers and investors without handing the closing process to an intermediary agency.

The platform combines a public discovery layer (a multilingual, multi-market B2B2C marketplace) with a private operations layer (Company Portal / Backoffice). RSC / REESKOVA publishes and connects; negotiation, paperwork and closing remain exclusively between the listing company and the customer.

Institutional principle: REESKOVA is a publishing and connection platform. It does not intermediate contracts, custody funds or handle legal procedures. This framework sets clear expectations for companies, buyers and ecosystem partners.

01 PURPOSE OF THIS DOCUMENT

- Explain REESKOVA's positioning within the RSC Group ecosystem and its role toward the listing company.
- Describe verticals, the buyer journey, SaaS capabilities and corporate verification rules.
- Document the actual flows for onboarding, inventory publishing, contact and visit scheduling.
- Define institutional boundaries, reciprocal commitments and official contact channels.
- Serve as an evaluation basis for onboarding real-estate firms, dealerships, developers and partners.

02 PRODUCT OPERATING SCOPE

DIMENSION	DETAIL
Verticals	Properties, vehicles, services and credit options published by partners
Model	B2B2C marketplace + Company Portal / Backoffice for verified advertisers
Markets	Multi-market configuration with a strategic LATAM+ and international focus
Interface languages	Portuguese, Spanish, English, French, German, Italian and Arabic
Company admission	Corporate application with verification before operational activation
RSC role	Publishing and connection; no contract intermediation or fund custody

03 CONTENTS

- 04 RSC Group and the definition of REESKOVA
- 05 Market context and value proposition
- 06 Verticals, publishing rules and audiences
- 07 Buyer journey and contact points
- 08 SaaS infrastructure and operating architecture
- 09 Onboarding, verification and activation
- 10 Daily operations: publish, leads and visits
- 11 Discovery, ecosystem and governance
- 12 Official channels and next steps

HOW TO USE THIS DOCUMENT

- Executive leadership and partnerships: assess strategic fit with REESKOVA infrastructure.
- Operations and sales: review the journey, SaaS panel and lead/visit flows before onboarding.
- Internal legal / compliance: align the publish-and-connect principle with company policies.
- Official contact to proceed: rscgrouppltda@gmail.com · +33 7 85 61 86 44 · www.rscchain.com

04 RSC GROUP — PARENT COMPANY

RSC Group is the parent technology company of a multi-product ecosystem focused on digital infrastructure, markets and associated services. Its institutional identity — professional, sober and technology-forward — sets the visual, operating and reputational standard for group brands, including REESKOVA.

The group combines marketplace, chain, wallet, financial services and applied technology capabilities. REESKOVA concentrates the premium marketplace experience for properties, vehicles and services, while other units contribute complementary layers without changing the marketplace principle of no contractual intermediation.

05 ECOSYSTEM MAP

UNIT / BRAND	ROLE
REESKOVA (RSC Market)	Premium B2B2C marketplace + Company Portal / Backoffice for verified advertisers
RSC Chain / Reesk Chain	Blockchain infrastructure and chain technology layer of the ecosystem
RSC Wallet	Wallet and payments capabilities within the group
RSC Bank · RSC Capital	Financial services and capital associated with the ecosystem
Ora Technology	Technology partner of the group
Auxiliary services	Escrow, P2P and Corporate layers when activated within the RSC ecosystem

06 OPERATIONAL DEFINITION OF REESKOVA

REESKOVA is a B2B2C marketplace: associated and verified companies manage listings from the Company Portal / Backoffice; consumers do not publish. Buyers discover inventory, contact the advertiser, schedule visits and advance the purchase directly with the company. RSC enables publishing, discovery, messaging and scheduling infrastructure; it does not replace the advertiser in the commercial relationship.

DIMENSION	INSTITUTIONAL DETAIL
Legal-operating nature	Publishing and connection platform; not a real-estate or automotive brokerage
B2B model	SaaS infrastructure and digital distribution for verified companies
Who publishes	Only associated companies after onboarding and verification
Who buys / browses	Consumers, investors and users of the public marketplace
Verticals	Properties, vehicles, services and credit options published by partners
Product coverage	Multi-market configuration with strategic LATAM+ communication
Languages	Seven interface languages for regional and international operations
Explicit boundary	No contract intermediation, no fund custody, no legal paperwork

Positioning in brief: "A marketplace, not an agency." The company keeps commercial control; REESKOVA provides infrastructure, audience and operating tools.

07 MARKET CONTEXT

The digital environment for properties, vehicles and services remains fragmented. Companies operate across disconnected vertical portals, with heavy competition for impressions, weak lead traceability and little integration between discovery, contact, visits and commercial follow-up. Buyers, by contrast, expect a continuous and transparent journey.

- Isolated vertical portals force companies to duplicate inventory, brand presence and commercial effort.
- Impression-led metrics do not guarantee conversation or a qualified visit.
- Without CRM connected to the demand channel, leads are lost across WhatsApp, forms and scattered email.
- Buyer trust erodes in open classifieds with weak advertiser verification.
- LATAM+ and adjacent markets concentrate growing digital demand in housing, mobility and services.
- Multi-branch operations need consistent corporate identity and centralized inventory control.

08 REESKOVA VALUE PROPOSITION FOR COMPANIES

REESKOVA answers that context with a unified ecosystem: multi-vertical distribution, actionable leads in a panel, verified identity, and a clear separation between digital infrastructure and closing responsibility.

Unified distribution

One channel for properties, vehicles and services inside a coherent purchase journey.

Actionable leads

Chats, requests and visits reach the company's operating environment — not only traffic metrics.

Verified trust

Marketplace reserved for associated companies; RSC seal visible on profile and listings.

Commercial control

Price, negotiation, contract and payment remain between advertiser and customer.

SaaS operations

Listings, CRM, chat, scheduling, analytics and AI on shared infrastructure.

Expanded ecosystem

Financing, insurance and contextual services without making RSC the deal intermediary.

09 EXPECTED OPERATING OUTCOMES

- Stronger brand coherence when publishing inventory under a verified corporate identity.
- Less friction between public discovery and internal commercial response.
- Traceability of contacts and visits with clear statuses for the sales team.
- Scalability across markets and languages without rebuilding the channel from scratch.
- Legal-operating alignment: the company closes; the platform connects.

Commercial focus of the For Companies product: publish listings, receive qualified leads and run operations in the SaaS panel, inside an ecosystem built for real-estate firms, dealerships and developers.

10 MARKETPLACE VERTICALS

REESKOVA organizes supply into verticals that follow the purchase decision. The company publishes in the category it operates; the buyer navigates the ecosystem with a continuous experience, filters, map and direct contact.

VERTICAL	SCOPE AND DYNAMICS
Properties	Homes, apartments, land, commercial assets, launches, condominiums, beach and countryside; buy and rent. Published by verified real-estate firms and developers, with rich listing pages, map, comparison and contact.
Vehicles	Cars, SUVs, motorcycles and related categories, new or used. Published by verified dealerships. The journey prioritizes fast leads, chat and visits to the point of sale.
Services	Journey layers: insurance, moving, décor, energy, connectivity and related partners. They add contextual value without turning REESKOVA into the service intermediary.
Credit / financing	Options published by companies or partners. Evaluation, approval and the financial agreement are between the customer and the entity. In product, the credit flag is prioritized in Brazil.

11 PUBLISHING RULES

RULE	APPLICATION
Verified companies only	Individuals do not manage listings on the marketplace
Backoffice as source	Inventory is created and maintained in the company panel and synced to public showcases
Corporate identity	Name, logo, document, branches, hours and WhatsApp channel may be displayed
Verified seal	Trust signal on cards and detail pages when company/listing are verified
Content quality	The company is responsible for accuracy, updates and legal compliance of listings
Removal / suspension	RSC may remove content or restrict access for non-compliance or integrity risk

12 BUSINESS AUDIENCES

AUDIENCE	MODE OF OPERATION
Real-estate firms	Publish properties, receive qualified contacts and connect visits and partner credit options.
Dealerships	Expose stock, capture real-time leads and accelerate showroom / point-of-sale visits.
Developers	Launch projects, manage units and capture demand from early stages.
Agencies and retail	Onboarding categories admitted for specialized commercial operations.
Service partners	Participate in the journey with insurance, home, energy, financing and related offers.

13 BUYER JOURNEY

The journey is designed to convert discovery into a commercial relationship with the listing company. Each stage generates an operating event usable by the sales team. RSC does not organize physical logistics or documentary closing.

01 Search Explore inventory with filters, map, comparison and AI	02 Contact RSC chat, WhatsApp or request to the advertiser	03 Visit Schedule date and time with the company	04 Negotiate Terms between customer and company	05 Close Contracts and payments outside RSC
--	--	--	---	---

14 FUNCTIONAL DETAIL BY STAGE

STAGE	WHAT HAPPENS / WHAT THE COMPANY RECEIVES
Search	The buyer browses property or vehicle showcases, applies filters, switches views (list, gallery, map, satellite) and may compare options.
Contact	From the listing page, starts RSC chat or WhatsApp. The thread or contact is routed to the listing company for commercial response.
Visit	Completes a scheduling request; the company manages confirmation, cancellation or reschedule proposals from its panel.
Negotiate	Price, terms, paperwork and due diligence are handled between the parties, outside RSC intermediation.
Close	Signature, payments, registration and delivery are solely the responsibility of customer and company.

15 CONTACT POINTS ON THE PUBLIC LISTING

The listing page concentrates the actions that feed the company's commercial funnel. These actions are designed to reduce friction and leave traceability in the advertiser's operating environment.

RSC Chat In-platform messaging. The team replies from the Leads Panel / Backoffice and keeps history.	WhatsApp Fast channel linked to the corporate number configured by the company in its operating profile.
Schedule visit Capture of name, phone, optional email, date, time and notes, with availability validation.	Compare & favorites Buyers organize alternatives; this increases recontact intent and conversation quality.

Principle repeated to buyers and companies: RSC does not handle paperwork, does not sign contracts, does not custody money and does not close deals. Visits, documentation and delivery remain exclusively between customer and company.

16 IMPLICATIONS FOR THE SALES TEAM

- There must be an operating owner for chat and visit response with an internal SLA defined by the company.
- Listing quality (media, data, price, location) directly conditions lead quality.
- Verification and the RSC seal strengthen contact rates versus unverified listings on other channels.
- Combined use of chat + WhatsApp + scheduling covers different levels of buyer intent.

17 EXTENDED PROPOSITION FOR COMPANIES

Joining REESKOVA is not only about listing inventory. The company operates inside infrastructure that combines public distribution, verified identity and private commercial management tools. Value is measured by the ability to convert discovery into conversation and visits.

18 OPERATING BENEFITS

- A demand channel aligned to verified inventory — not open classifieds for individuals.
- Centralization of chats, visits and requests with clear operating statuses for the team.
- Visible corporate identity: brand, document, branches, hours and WhatsApp on the marketplace.
- Listing sync from Backoffice to multilingual, multi-market public showcases.
- Ability to highlight inventory and use AI insights to prioritize commercial actions.
- Clear separation between digital distribution and legal responsibility for closing.
- Scalability for networks that need brand consistency across multiple locations.

19 WHAT REESKOVA DOES NOT ASSUME

OUT OF SCOPE	PRACTICAL IMPLICATION
Contract intermediation	RSC does not draft, sign or guarantee contracts between buyer and company
Fund custody	RSC does not hold the deal price or act as escrow for the marketplace transaction
Legal / registry procedures	Notarial, registry or regulatory paperwork is outside the platform
Closing and delivery	Physical and legal execution of the deal belongs to the parties
Credit approval	If financing exists, the partner or financial advertiser decides approval

20 IDEAL COMPANY PROFILE

REESKOVA is built for organizations with real inventory, commercial response capacity and willingness to uphold accuracy standards. Onboarding verifies corporate identity precisely to preserve that network quality.

- Holds active inventory of properties, vehicles or services published professionally.
- Has a team or owner to respond to leads within commercially reasonable timelines.
- Accepts operating under curated-marketplace and verification rules.
- Values controlling the customer relationship through closing, without ceding it to a digital agency layer.
- Seeks multi-market or multilingual presence without fragmenting operations across isolated tools.

21 SAAS INFRASTRUCTURE — COMPANY PORTAL

Day-to-day operations concentrate in the Company Portal / Backoffice. The REESKOVA marketplace syncs published inventory and delivers demand events generated by buyers. The Backoffice is the source of truth for listings and organization; the marketplace is the discovery, contact and scheduling layer.

22 BUSINESS ENVIRONMENT MODULES

MODULE	FUNCTION
Listing management	Create, edit, highlight, media and active inventory control
Leads CRM	Organize contacts, requests and visits in one flow
Integrated chat	Reply to RSC threads with continuity and history
Visit scheduling	Manage requests with pending, confirmed, cancelled and reschedule_proposed statuses
Analytics	Performance visibility by listing, region and conversion
Verified seal	Public trust signal associated with profile and listing pages
Sales AI	Insights and commercial prioritization to highlight inventory
Corporate WhatsApp	Fast channel linked to the organization profile
Organization data	Logo, tax ID, branches, hours and contact details
Network extensions	Multi-branch and API integrations for larger-scale operations

23 OPERATING ARCHITECTURE

LAYER	BEHAVIOR
Company Backoffice	Inventory and organization administration; source of truth for listings
Marketplace API	Sync of listings to public marketplace showcases
Demand events	Chats, visits and contacts generated publicly and consumed by the company
Verified profile	Trust attributes visible on cards, detail pages and search
Buyer hub	Buyers also keep favorites, comparisons and visits in their user space

24 DATA-GOVERNANCE IMPLICATIONS

- The company is responsible for published content and for data received outside the platform.
- REESKOVA processes account, publishing, discovery, messaging and visit data under its policies.
- Financial or service partners involved after contact remain independently responsible for their processes.
- Onboarding verification may require corporate identification and contact validation.

Deliberate design: separating distribution (marketplace) from operations (SaaS) scales audience without forcing the company to surrender control of commercial closing.

25 ONBOARDING PROCESS

Company admission is verified. The process protects marketplace quality and buyer trust. This is not an instant unchecked signup: operational activation happens after RSC team validation.

01

Apply

Corporate form in For Companies

02

Review

Identity and data validation within 24 h

03

Activate

Credentials and Backoffice access

04

Go live

Profile, inventory and lead handling

26 INFORMATION REQUIRED IN THE APPLICATION

FIELD	PURPOSE
Company name	Commercial / legal identification for the corporate profile
Tax ID / document	Validation of corporate existence and identity
Corporate email	Channel for onboarding communication and access delivery
Phone / WhatsApp	Operating contact during verification and activation
Category	Classification: real estate, automotive, agency, retail or services

27 APPLICATION HANDLING

- The application is registered with an initial pending status for internal review.
- The RSC team may request additional corporate verification information.
- Duplicate pending applications are rejected to avoid double registrations.
- After approval, access instructions to the Company Portal / Backoffice are sent.
- The company configures profile, visual identity, branches and contact channels before or when publishing inventory.

28 POST-APPROVAL ACTIVITIES

ACTIVITY	EXPECTED RESULT
Backoffice access	Authorized team enters the administration environment
Organization setup	Logo, document, branches, hours and operating WhatsApp
Initial publishing	First set of active listings in the relevant vertical
Visible verification	Seal activation according to RSC team validation
Demand operations	Handling chats and visits from the leads panel
Optimization	Use of highlights, analytics and insights to prioritize inventory

Application channel: For Companies section in REESKOVA. Institutional contact: rscgrouppltda@gmail.com · +33 7 85 61 86 44 · www.rscchain.com

29 OPERATION A — PUBLISH INVENTORY

Publishing is managed in the Backoffice. Once active, the listing syncs to the marketplace and becomes available in public showcases. Data and media quality determine conversion capacity.

01

Create

Data, price, location, attributes

02

Media

Photos, video and visual materials

03

Publish

Active status in Backoffice

04

Sync

Exposure in public showcase

05

Optimize

Highlights, analytics and insights

- Listings must keep price, availability and attributes updated to avoid invalid leads.
- Professional media and correct geolocation improve discovery via map and filters.
- Highlights and AI insights help prioritize units or vehicles with relatively higher demand.
- The company retains authority to pause or remove inventory from its administration environment.

30 OPERATION B — FROM CONTACT TO LEAD

STEP	DESCRIPTION
1	The buyer opens the public listing page in the relevant showcase.
2	Selects RSC chat or WhatsApp as the first contact channel.
3	A thread or contact is generated toward the listing company.
4	The team replies from the Leads Panel / Backoffice under its internal protocol.
5	The conversation remains available for follow-up, qualification and external commercial closing.

31 OPERATION C — VISIT SCHEDULING

STEP	DESCRIPTION
1	The buyer chooses the schedule-visit action on the listing page.
2	Enters contact details, date, time and relevant notes.
3	The system validates the request against availability defined by the company.
4	The visit is registered in an initial pending management status.
5	The company confirms, cancels or proposes rescheduling; the buyer sees status in their space.

Visit statuses used in operations: pending, confirmed, cancelled and reschedule_proposed. This state machine enables commercial follow-up without RSC intervening in physical logistics.

32 OPERATING BEST PRACTICES

- Define maximum first-response times for chat and visits.
- Keep realistic agenda slots to avoid systematic cancellations.
- Unify lead-qualification criteria across branches when a network exists.
- Record post-contact outcomes in the company's internal CRM when applicable.

33 DISCOVERY CAPABILITIES

Beyond the B2B panel, REESKOVA provides public tools that raise traffic quality toward company inventory. These capabilities exist to improve intent, not only visit volume.

Maps and geography

List, gallery, map and satellite views; hierarchical navigation and geocoding for local discovery.

Comparator

Property and vehicle comparison, favorites and continuity between guest session and account.

Reeskova AI

Natural-language search and insights oriented to commercial inventory prioritization.

Visible financing

Signaling of partner credit options; the agreement remains with the entity.

Multilingual

Interface in seven languages for regional and international markets.

Verified seal

Public badge on cards and detail pages to reinforce buyer trust.

34 RELEVANT PRODUCT SURFACES

SURFACE	FUNCTION
For Companies	Corporate B2B entry and value explanation for advertisers
Company registration	Application form for incorporation and verification
Property showcase	Public discovery of properties
Vehicle showcase	Public discovery of automotive inventory
Services / financing	Journey layers and partner credit options
Company Portal / Backoffice	Inventory, organization and demand operations administration

35 TRUST SIGNALS TO THE MARKET

- Marketplace restricted to associated companies — not an open classifieds board for individuals.
- Onboarding verification before full operating access.
- Corporate identity visible on listing pages and search results.
- Institutional transparency about RSC's role: publishes and connects; boundaries are explicit.
- Use, privacy and compliance policies available in the product for buyers and companies.

36 IMPLICATION FOR COMMERCIAL STRATEGY

A company operating in REESKOVA should treat the channel as demand and reputation infrastructure. Inventory consistency, response speed and clarity of corporate identity are the factors that turn presence into measurable commercial results.

37 ECOSYSTEM AROUND THE DECISION

REESKOVA is part of a broader journey inside the RSC Group ecosystem. Partners and group units may contribute complementary layers — financing, insurance, home, energy — without changing the principle that closing of the main deal remains between customer and listing company.

LAYER	CONTRIBUTION
Financing	Credit options visible at decision time; agreement with the corresponding entity
Insurance	Contextual protection associated with property or vehicle
Home and energy	Post-decision services: moving, décor, solar, connectivity
RSC Group	RSC Group, RSC Chain, wallet, bank, capital and technology partners of the ecosystem

38 INSTITUTIONAL AND LEGAL FRAMEWORK

REESKOVA's legal positioning is deliberately bounded. That clarity reduces regulatory ambiguity and aligns expectations among RSC, companies and end users.

- REESKOVA / RSC Market operates as a publishing and connection platform within the RSC Group ecosystem.
- It does not intermediate contracts, payments or legal procedures between buyer and advertiser.
- It does not act as a brokerage, dealership, escrow or law firm.
- Advertisers and partner institutions are independently responsible for their own processes and obligations.
- Companies must maintain accurate information, compliant listings and responsible attention to received demand.
- RSC may apply quality controls, verification and suspension to protect marketplace integrity.

39 RECIPROCAL COMMITMENTS

RSC GROUP	PARTICIPATING COMPANY
Provide access to REESKOVA infrastructure	Provide accurate and updated corporate data
Coordinate activation via the partnerships team	Keep listings responsible and current
Preserve a curated and verified marketplace	Handle leads and visits to a professional standard
Respect the partner's brand image	Respect RSC / REESKOVA institutional identity
Maintain official contact channels	Designate a permanent internal operating contact

Any specific commercial collaboration, creative annex or particular condition between RSC and a company must be documented in writing. This document is an informative corporate presentation, not a contract.

40 HOW TO JOIN AS A COMPANY

To operate on REESKOVA infrastructure, the company completes corporate registration in the For Companies section or writes to the RSC team. Onboarding includes verification, access activation and support to launch the profile and initial inventory.

41 OFFICIAL CHANNELS

CHANNEL	DETAIL
Web registration	REESKOVA → For Companies → company registration
Corporate email	rscgrouppltda@gmail.com
Phone (France)	+33 7 85 61 86 44
Corporate website	www.rscchain.com
Recommended subject	Company onboarding — REESKOVA
Information to include	Legal name, country/market, vertical, approximate inventory volume and operating contact

42 PREPARATION CHECKLIST

- Have a valid tax ID / corporate identifier ready.
- Define operating email and phone that will be used for verification and support.
- Prepare visual identity (logo) and branch/hours data when applicable.
- Select the initial inventory to publish after activation.
- Appoint an internal owner for onboarding and lead response.
- Internally review the non-intermediation principle to align the commercial team's expectations.

43 ONBOARDING FAQ

QUESTION	INSTITUTIONAL ANSWER
Who can publish?	Only associated and verified companies. Individuals do not manage listings.
Does RSC intermediate closing?	No. It publishes and connects; negotiation, contract and payment are between the parties.
How long does verification take?	The standard review process is up to 24 business hours of analysis.
Which verticals are accepted?	Properties, vehicles, services and associated onboarding categories.
Where is inventory managed?	In the Company Portal / Backoffice, synced to the public marketplace.

44 CLOSING

REESKOVA gives companies digital infrastructure to publish, capture demand and operate the commercial relationship with clear roles. The marketplace distributes and connects; the company decides, negotiates and closes. Incorporation is aimed at organizations that value verification, commercial control and professional digital-channel operations.

One Marketplace. Endless Opportunities. — REESKOVA by RSC Group · rscgrouppltda@gmail.com · +33 7 85 61 86 44 · www.rscchain.com

Notice: REESKOVA / RSC Market is a publishing and connection platform operated within the RSC Group ecosystem. It does not intermediate contracts, custody funds or handle legal procedures.
